11th International Scientific and Practical Seminar «HYPACK 2015»

11th International Scientific and Practical Seminar «HYPACK 2015» was held at the Maritime Transportation and Technology Faculty from 6 to 8, 2015. The seminar's main objective – is to support specialists in the fields of hydrography, cartography, navigation, users of modern HYPACK software in Ukraine.

This software package is designed for solving almost all hydrographic tasks such as planning process of seafloor survey, including surveying itself, the final product output in the form of cartographic maps, export data in GIS format (DXF, DGN, etc.), as well as volume calculation of the dredging operations and electronic navigational charts creation in S57 format. This software has a large worldwide popularity among hydrographers, cartographers, manufacturers of navigational charts.

The HYPACK program has been used as a practical guide to the subject of "hydrography" for the cadets, which was presented to ONMA on a free-of-charge basis by the President of this company.

The seminar was held under the leadership of Patrick Sanders (USA), Chief Operating Officer. The seminar was attended by the representatives from various organizations such as: staff of the State Enterprise "State Hydrography", the representatives from Shipping Safety Inspectorate of Ukraine, "Delta-Pilot", Private Enterprise "The Shield" and others.), as well as teachers and cadets of the Academy.
