### **Quest of Odessa National Maritime Academy**

Quest dedicated to the maritime history of Odessa was successfully held on 31 October. Having looked the movie "Chernomorochka" shot in Odessa, the participants had to guess the encrypted meeting place.

Team of the Maritime Law and Management Faculty and Sea Navigation Faculty as well as the team of Naval Forces Faculty participated in the quest. Both teams coped with the first task and met at the appointed place - the Vorontsov Palace at 10.00. After presenting the tasks, the quest began. Each team developed its tactics: the first team immediately set off with the first task, and the second - for the start guessed all the issues and developed the route. All locations were concentrated within the city center, so it was not difficult to get there. There were popular tourist spots, attractions and monuments, as well as the places of little notice among locations, the search of which took some time. It was interesting to find out what was the link between the clock of the City Council and the cannon, standing on the building of the Maritime Museum, as well as to get to know which outstanding people were graduates of the Maritime College named after O.I. Marinesko of ONMA and much more.

The participants quickly coped with the task, and the first team came at 12.30, but the victory was awarded for the number of points and for the correct answers. The quest was finished near the fourth academic building of ONMA. The team of Naval Forces Faculty won with a difference of one point. The cadets did well all of the tasks and worthily won the first place.

We are looking forward to conducting new quests and the participation of more cadets.

Cadet of the 4<sup>th</sup> course of management speciality

Natalya Popova
