Visiting NU«OMA» by the delegation of "Huawei" company

The delegation of "Huawei" company visited National University «Odessa Maritime Academy» on June 14, 2016. The company is one of the leaders in the world elite of developers and manufacturers of wireless equipment and radioelectronic technology as well as takes leading positions in the field of information and computer technologies, conducts basic research in the field of communications, radioelectronics and informatics.

The company took interest in some developments and results of research carried out by Ukrainian scientists, which were published in major scientific journals. Thereunder, 9 leading educational establishments of Ukraine were selected for the delegation's visit by the company management, composed of the leading experts of "Huawei" company. Among these leading educational establishments was NU «OMA».

The guests were shown the simulator complex NU«OMA», which made a very favorable impression on the delegates. Thereafter, the presentation of scientific reports, represented by the university researchers on communication, radar, navigation, informatics, antenna technology and applied mathematics was carried out. The presentations were of great interest to the delegation's members. There were many questions, to which members of the delegation received comprehensive answers. All presentations were conducted in English.

M.V. Miyusov, the Rector of NU «OMA», V.A. Golikov, Deputy Rector on Scientific Work, V.M. Koshevoy, Head of the Marine Radiocommunication Department and M.V. Chesnokova, Head of International and Economic Cooperation Department took an active part in the event. In conclusion, Mr. Zhao Keshuai, the Head of the delegation thanked the leadership of NU «OMA» and all the staff, who took part in the event as well as expressed gratitude for the warm welcome and hope for further useful contacts and cooperation between the university and the company.
