The opening of new park of turning machines for ship engineers in NU «OMA»

The opening of a new high-quality equipment took place at Marine Engineering Faculty of National University «Odessa Maritime Academy» on December 22, 2016. Crewing company V.Ships Ukraine set the park of turning machines to ensure quality training of cadets in the frameworks of sponsorship programme. Every cadet, potential ship engineer is obliged to have 12 months of combined practices, of which at least 6 months must be either on ships or in mechanical workshops or shipyards. Thanks to a new modern equipment, the cadets of NU «OMA» will be prepared for the aforementioned trade tests.
